

Lauren Boyle studied engineering and graduated from The University of Texas at Austin with studies also in Grenoble, France and Sydney, Australia. Her professional background includes both civil and mechanical engineering in a diverse array of applications. She is currently the Vice President at CACTX Surfaces, focusing mainly on specialty engineering in the decorative/architectural pavement department, and specifically in the design and installation of decorative pavement surfacing solutions/systems for municipal, commercial and residential projects throughout North Carolina. She was born in Winston-Salem and takes deep pride in her home town!
