STAFF REPORT  
AUGUST 3, 2022 HRC MEETING

Case #: COA2022-064  
Staff: Heather M. Bratland

Applicant: Bud Clark, West End Renaissance Residence Development LLC

LOCATION

District: West End Historic Overlay District  
Street: 207 Glade View Court, Winston-Salem  
Building: n/a  
Status: Noncontributing  
Local Historic Landmark#: n/a

REQUEST(S)

- Construction of a house

APPLICABLE DESIGN REVIEW STANDARDS

West End Historic Overlay District Design Review Standards available at:  
https://www.cityofws.org/DocumentCenter/View/4089

STAFF COMMENTS

This vacant parcel is part of the former grounds of the YWCA, which is being redeveloped into a small group of single-family houses.

STAFF FINDINGS

Commission staff finds that the project is not incongruous with the character of the West End Historic Overlay District because:

1) The applicant proposes to construct a single-family house on the lot at the corner of Glade Street and West End Boulevard. The setback, spacing, and orientation of the house on the lot are compatible with those of nearby buildings that contribute to the character of the West End. The site has already been partially graded and disturbance will be minimal. The site character, topography, and vistas and views will not be substantially altered. The site does not have any character-defining site features. (*New Construction*, West End Standards 1-3)

2) The 2 ½ story height, rectilinear form, hipped roof, and 3-bay width of the house are compatible in height, form, size, scale, massing, proportion, and roof shape with surrounding buildings that contribute to the special character of the West End. The doors and windows are arranged symmetrically with a central door flanked by banked two-over-one windows on the first floor and a central inset bay of two sets of paired two-over-one windows flanked by triple two-over-one windows on the second floor. The dormer uses a single triple window with diamond paneled sashes. The sidewalks use an asymmetrical arrangement of banked and single two-over-one windows, which is typical for secondary facades. The spacing, placement, scale, orientation, proportion, and size of the window and door openings is compatible with surrounding buildings that contribute to the special character of the West End. (*New Construction*, West End Standards 4-5)

3) The proposed windows are aluminum clad wood windows with simulated divided light muntins that use permanently applied interior and exterior grilles. These window details are the same as those required for replacement windows on contributing structures in the West End. Diamond-pane and two-over-one windows are common throughout the West End. The proposed doors are
constructed from wood in a French door style, which is found commonly in the West End. The
material, proportion, pattern, and details of the windows and doors are compatible with
surrounding buildings that contribute to the special character of the West End. (New Construction,
West End Standard 6)

4) The proposed house will be clad with Pinehall Brick’s Tidewater series in Barker House gray-
brown finish, Certainteed Landmark series asphalt shingles, and painted, smooth finished Hardie
Artisan lap siding on the sidewalls of the dormers. Painted Hardie fiber cement products will also
be used for soffit and trim details. Porch railings with square balusters will be constructed from
Perennial Wood, a treated Southern pine, and painted. Square, paired porch posts will be a resin
and marble dust composite. Porch decking will be square-edge Trex in a gray finish. Garage
doors will be steel with a factory-finished paint and glass windows. The light fixtures are designed
in a Craftsman style with metal cages and frosted glass lanterns. The materials and finishes are
compatible with, yet discernable from, historic materials and finishes found in surrounding historic
buildings in terms of composition, scale, module, pattern, detail, texture, and finish. (New
Construction, West End Standards 7-8)

STAFF RECOMMENDATION

Based on the preceding findings, staff recommends that the Commission approve COA2022-064 located
at 207 Glade View Court (PIN 6825-76-5652), within the West End Historic Overlay District, with the
following conditions:

1) The applicant shall receive, prior to commencement of the work, all other required permits or
permissions from governmental agencies;

2) Commission staff shall review and approve any revisions or deviations to any portion of the as-
submitted work, that qualifies as a minor work, prior to commencement of that portion of the
project; and

3) The applicant shall submit the Certificate of Appropriateness Request for Certification of
Completed Work form and photo documentation of the completed project to HRC staff within ten
(10) days of its completion.
