other officers operating Coast Guard vessels, and Federal, state, and local officers designated by or assisting the Captain of the Port Charleston in the enforcement of the regulated areas.

(c) Regulations. (1) All persons and vessels are prohibited from entering, transiting through, anchoring in, or remaining within the regulated areas unless authorized by the Captain of the Port Charleston or a designated representative.

(2) Persons and vessels desiring to enter, transit through, anchor in, or remain within the regulated areas may contact the Captain of the Charleston by telephone at (843) 740–7050, or a designated representative via VHF radio on channel 16, to request authorization. If authorization to enter, transit through, anchor in, or remain within the regulated areas is granted by the Captain of the Port Charleston or a designated representative, all persons and vessels receiving such authorization must comply with the instructions of the Captain of the Port Charleston or a designated representative.

(3) The Coast Guard will provide notice of the regulated areas by Broadcast Notice to Mariners, Marine Safety Information Bulletins, and on-scene designated representatives.

(d) Effective date. This rule is effective from 9 p.m. until 10:30 p.m. on July 4, 2013.

Dated: June 6, 2013.

M.F. White,
Captain, U.S. Coast Guard, Captain of the Port Charleston.

BILLING CODE 6560-04-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Approval and Promulgation of Air Quality Implementation Plans; Charlotte, Raleigh/Durham and Winston-Salem Carbon Monoxide Limited Maintenance Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve changes to the North Carolina State Implementation Plan (SIP), submitted by the State of North Carolina Department of Environment and Natural Resources (NC DENR), on August 2, 2012. Specifically, the State submitted limited maintenance plan updates for carbon monoxide (CO), showing continued attainment of the 8-hour CO national ambient air quality standard for the Charlotte, Raleigh/Durham and Winston-Salem areas. EPA is approving this SIP revision because the State has demonstrated that the revision is consistent with the Clean Air Act (CAA or Act).

DATES: This rule will be effective July 22, 2013.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2012–0061. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not business available, i.e., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the FOR FURTHER INFORMATION CONTACT section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 to 4:30 excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Sean Lakeman, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–6043. Mr. Lakeman can be reached via electronic mail at lakeman.sean@epa.gov.

I. Analysis of the State’s Submittal
II. Response to Comments
III. Final Action
IV. Statutory and Executive Order Reviews

I. Analysis of the State’s Submittal

Section 175A of the Clean Air Act (CAA) contains four subsections (i.e., 175A(a)–(d)) pertaining to maintenance plans. Section 175A(a) establishes requirements for the maintenance plans associated with initial SIP redesignation requests. North Carolina previously addressed the 175A(a) requirements for the CO NAAQS and the State’s redesignation requests and associated maintenance plans were ultimately approved by EPA for all three of North Carolina’s CO areas as a result. See 59 FR 48399 and 60 FR 39258.

Section 175A(b) requires states to submit an update to the maintenance plan eight years following the original redesignation to attainment. For the section 175A(b) update, the state must outline methods for maintaining the pertinent NAAQS for ten years after the expiration of the ten-year period as referred to in subsection (a) (i.e., North Carolina’s maintenance plan updates must outline methods for maintaining the CO NAAQS through 2015). NC DENR satisfied the requirements for the second maintenance plans for all of its CO maintenance areas, and EPA subsequently approved NC DENR’s second maintenance plan for each of the State’s CO maintenance areas. See 71 FR 14817, March 24, 2006. Although North Carolina has previously satisfied the requirements for the 175A(b) maintenance plan updates for all of its CO areas, the State has elected to convert these maintenance plans to limited maintenance plans. A summary of EPA’s analysis for this revision is provided below.

Finally, with respect to the remaining sub-sections of section 175A, EPA notes that sub-section (c) does not apply to this rulemaking, given that EPA has previously redesignated the Charlotte, Raleigh/Durham, and Winston-Salem areas to attainment for CO. Section 175A(d), which includes the contingency provisions requirements associated with maintaining the maintenance plan, is relevant to today’s revision and is addressed in section A4, below.

A. Consistency With the October 6, 1995, Memorandum

EPA’s interpretation of section 175A of the CAA, as it pertains to limited maintenance plans for CO, is contained in the October 6, 1995, Memorandum from Joseph W. Praise to the Air Branch Chiefs, Regions I–X, entitled “Limited Maintenance Plan Option for Nonclassifiable CO Nonattainment Areas.” See the docket for today’s
rulemaking for a copy of this memorandum. North Carolina addressed the five major elements of that policy, as follows:

1. Attainment Inventory

The state is required to develop an attainment emissions inventory to identify a level of emissions in the area which is sufficient to attain the CO NAAQS. This inventory should be consistent with EPA’s most recent guidance on emission inventories for nonattainment areas available at the time the SIP is developed and should include the emissions during the time period associated with the monitoring data showing attainment. It should be based on actual “typical CO season day” emissions for all source classifications (i.e., stationary point and area sources and nonroad and onroad mobile sources) for the attainment year. In its August 2, 2012, submittal, NC DENR provided a comprehensive CO emissions inventory for nonroad mobile, onroad mobile, point, and area sources for the Charlotte, Raleigh-Durham, and Winston-Salem CO Maintenance Areas. NC DENR collected or developed the point source emissions inventory from stationary sources that have the potential to emit more than five tons per year of CO emissions from a single facility and are required to have an operating permit. The stationary area source inventory is estimated on a county level and consisted of those sources whose emissions are relatively small, but due to the large number of sources, the collective emissions could be significant. North Carolina estimated the stationary area source emissions by multiplying an emission factor by some known indicator of collective activity (such as fuel usage, number of households, or population). For on-road mobile source emissions, NC DENR used EPA’s Motor Vehicle Emission Simulator (MOVES) model version 2010a (MOVES2010a), released in August 2010, for estimating vehicle emissions.

Nonroad mobile sources are pieces of equipment that can move but do not use roadways (e.g., lawn mowers, construction equipment, railroad locomotives, and aircraft). The emissions from this category are calculated at the county level using EPA’s NONROAD2008 NONroad mobile model, with the exception of railroad locomotives and aircraft engines. The railroad locomotives and aircraft engines are estimated by taking an activity and multiplying by an emission factor.

Table 1 displays the 2010 attainment year emissions inventory as required for the limited maintenance plans.

Table B of North Carolina’s SIP submittal provides detailed discussions regarding the development of emissions for the four emission source classifications, and is provided in the docket for today’s rulemaking.

2. Maintenance Demonstration

In the October 6, 1995, Memorandum, EPA stated that the maintenance demonstration requirement is considered to be satisfied for nonattainable areas if the monitoring data shows that the area is meeting the air quality criteria for limited maintenance areas (i.e., 85 percent of the eight-hour CO NAAQS, or 7.65 parts per million (ppm)). EPA determined in this same memorandum that there is no requirement to protect emissions over the maintenance period. Instead, EPA believes that if the area begins the maintenance period at, or below, 7.65 ppm (85 percent of the 8-hour CO NAAQS), the applicability of prevention of significant deterioration requirements, control measures already in the SIP, and other federal measures should provide adequate assurance of maintenance throughout the maintenance period. Monitoring data from 2008–2011 shows all three areas below the 8-hour CO NAAQS values. See Table 2 below. All monitoring levels are well below the 85 percent threshold of 7.65 ppm and therefore the State has satisfied the maintenance demonstration requirement for a limited maintenance plan for each of its CO maintenance areas.

*The Direct Final Rulemaking on February 22, 2013, listed the Wake County 2009 design value as 1.3 ppm. See 78 FR 12238. The value reported by the State was actually 1.3 ppm and the change is reflected in this final rulemaking.*
3. Monitoring Network and Verification of Continued Attainment

Once an area has been redesignated, the state should continue to operate an appropriate air quality monitoring network, in accordance with 40 CFR part 58, to verify the attainment status of the area. This is particularly important for areas using a limited maintenance plan because there will be no cap on emissions. In accordance with 40 CFR part 58, NC DENR commits to continue monitoring CO at the existing regulatory monitors in the three CO maintenance areas to ensure that CO concentrations remain well below the 7.55 ppm threshold for limited maintenance plans. The State’s monitoring plan for 2012 can be found at the following site: http://www.nccra.org/monitoring_plan/new_plan/2012_NCDAQ_Network_Plan.pdf. EPA has determined that the State has satisfied the monitoring network and verification of continued attainment requirements for the limited maintenance plans.

4. Contingency Plan

Section 175A(d) of the CAA requires that a maintenance plan include contingency provisions, as necessary, to promptly correct any violation of the NAAQS that occurs after redesignation of an area. The October 6, 1995, Memorandum further requires that the contingency provisions identify the measures to be adopted, a schedule and procedure for adoption and implementation, and a specific time limit for action by the state.

In its August 2, 2012, submittal, NC DENR committed to the same contingency measures that EPA previously approved on March 24, 2006 (71 FR 14817) and a subsequent clarification on June 19, 2007 (72 FR 33692). The State pre-adopted an oxygenated fuels program with minimum oxygen content by weight of 2.7 for Charlotte, Raleigh-Durham, and Winston-Salem maintenance areas as a contingency measure for the CO maintenance plan. The oxygenated fuel program is required under the CAA for the Raleigh-Durham and Winston-Salem areas as a required control measure prior to the attainment redesignation. Charlotte was placed under the oxygenated fuel program for effective area-wide CO emission reduction and to ease State implementation efforts. The contingency measure triggering date will be no more than 60 days after an ambient air quality violation is monitored. NC DENR will commence an analysis and regulation development process during this time. The State will consider the following control measures:

a. Amending the oxygenated fuels program by adopting oxygenate content of 2.0 percent to 2.7 percent by weight, or activate of 2.7 percent by eight pre-adopted contingency measure, or 2.7 percent to 3.1 percent by weight;

b. Expanding coverage of oxygenated fuels to include counties where a strong commuting pattern into the core maintenance area exists;

c. Alternative fuel vehicle programs to include compressed natural gas and electric vehicles; and,

d. Employee commute options programs.

NC DENR committed to implement at least one of the control measures within 24 months of the trigger, or as expeditiously as practicable. EPA has determined that the State has satisfied the contingency plan requirements pursuant to section 175A(d) of the CAA as well as those of the October 6, 1995, Memorandum.

5. Conformity Determination Under the Limited Maintenance Plan

The transportation conformity rule of November 24, 1993 (58 FR 62188), and the general conformity rule of November 30, 1993 (58 FR 63214), apply to nonattainment areas and maintenance areas operating under the maintenance plans. Under either rule, one means of demonstrating conformity of federal actions is to indicate that expected emissions from planned actions are consistent with the emissions budget for the area. EPA’s October 6, 1995, Memorandum states that emissions budgets in limited maintenance plan areas may be treated as essentially not constraining for the length of the maintenance period because it is unreasonable to expect that such an area will experience so much growth in that period that a violation of the CO NAAQS would result. In other words, EPA concluded that, for these areas, emissions need not be capped for the maintenance period.

In accordance with the transportation conformity rule, approval of a limited maintenance plan only removes the requirement to conduct a regional emissions analysis as part of the conformity determination. The requirement to demonstrate conformity per the requirements in Table 1 of 40 CFR 93.109 still applies. Additionally, federally funded projects are still subject to project level transportation conformity analysis requirements. However, no regional modeling analysis would be required.

Transportation partners should note this approval of these limited maintenance plans in future transportation conformity determinations. Additionally, while the approvals of these limited maintenance plans waives the requirements for a regional emissions analysis for the CO NAAQS, as mentioned above, it does not waive other conformity requirements for the CO standard for the Charlotte, Raleigh-Durham and Winston-Salem areas, and it does not waive transportation conformity requirement for other pollutants/precurors for which these areas may be designated nonattainment or redesigned to attainment with a full maintenance plan.

II. Response to Comments

On February 22, 2013 (78 FR 12267), EPA published a direct final rule approving North Carolina’s August 2, 2012, SIP submission for a limited maintenance plan update for CO, showing continued attainment of the 8-hour CO NAAQS for the Charlotte, Raleigh/Durham and Winston-Salem areas.
Areas. EPA published an accompanying proposed approval in the event that comments were received such that the direct final rule needed to be withdrawn. Specifically, in the direct final rule, EPA stated that if adverse comments were received by March 25, 2013, the rule would be withdrawn and not take effect, but that the proposed rule would still remain in effect and that an additional public comment period would not be instituted if EPA could sufficiently address any comments received on the direct final rulemaking. On March 25, 2013, EPA received comments from a single commenter. The comments could be interpreted as adverse and, therefore, EPA withdrew the direct final rule. A summary of the comments received and EPA’s response is provided below.

Comment: The commenter stated “were studies conducted to establish the criteria for labeling as a maintenance area? Is there something geographic and standard about this area.”

Response: This comment is outside of the scope of today’s action. Nonetheless, EPA notes that the process to designate a maintenance area under the CO NAAQS involves an evaluation of specific criteria to determine whether an area is in compliance or out of compliance with the CO NAAQS. If an area is determined to be out of compliance, EPA then determines an appropriate boundary for the area and designates the area as a “nonattainment” area. The designation process for CO areas was completed in the early 1990’s. The Charlotte, Raleigh/Durham and Winston-Salem Areas were all designated as nonattainment for the CO NAAQS. Once an area is designated nonattainment, an area can be redesignated to “attainment” (i.e., meaning that the area is in compliance of the NAAQS). If it meets the criteria of section 107(d)(3)(C) of the CAA. All three of the North Carolina areas were redesignated to “attainment” for the CO NAAQS and are thus considered “maintenance” areas. See 59 FR 48399 and 60 FR 39258.

Comment: The commenter questioned whether the emissions parameters are “constraining the water vapor potential” and whether the emissions tolerances are “excessive considering most dealerships are manufacturing cars that use alternative energies and have done so for approximately 10 years now?”

Response: The on-road mobile source emissions inventory in North Carolina’s limited maintenance plans for the Charlotte, Raleigh/Durham and Winston-Salem Areas were developed according to EPA’s guidelines and with the MOVES emissions model. The MOVES model can be used to estimate exhaust and evaporative emissions as well as brake and tire wear emissions from all types of on-road vehicles. The MOVES model incorporates substantial new emissions test data and accounts for changes in vehicle technology and regulations as well as improved understanding of in-use emission levels and the factors that influence them. NC DENR appropriately utilized the MOVES model to estimate the on-road mobile source emissions for the limited maintenance plan for all applicable vehicles and technologies, for the Charlotte, Raleigh/Durham and Winston-Salem Areas.

III. Final Action

EPA is approving the aforementioned changes to the State of North Carolina SIP, because they are consistent with the CAA, and EPA’s policy related to limited maintenance plans.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k), 40 CFR 52.2(a).

Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

• is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
• does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
• does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
• is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19985, April 23, 1997);
• is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
• is not subject to the requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
• does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 19, 2013. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file any comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today’s Federal Register, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to
enforce its requirements. See section 307(b)(2).

ENVIRONMENTAL PROTECTION AGENCY
40 CFR Part 52

Approval and Promulgation of Implementation Plans; New York; Infrastructure SIP for the 1997 8-Hour Ozone and the 1997 and 2006 Fine Particulate Matter Standards

AGENCY: Environmental Protection Agency [EPA].

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency [EPA] is approving certain elements of New York’s State Implementation Plan [SIP] revisions submitted to demonstrate that the State meets the requirements of section 110(a)(1) and (2) of the Clean Air Act [CAA] for the 1997 8-hour ozone and the 1997 and 2006 fine particulate matter [PM_{2.5}] National Ambient Air Quality Standards [NAAQS]. Section 110(a) of the CAA requires that each state adopt and submit a SIP for the implementation, maintenance and enforcement of each NAAQS promulgated by the EPA and is commonly referred to as an infrastructure SIP.

DATES: Effective Date: This rule is effective on July 22, 2013.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R02–OAR–2013–0274. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Environmental Protection Agency, Region II Office, Air Programs Branch, 290 Broadway, 25th Floor, New York, New York 10007–1866. The Air Programs Branch does not accept e-mail comments or faxes.

FOR FURTHER INFORMATION CONTACT: Kirk J. Wieber, Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10007–1866, (212) 637–4249, or by e-mail at wieber.kirk@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

Under CAA section 110(a)(1), states are required to submit plans called state implementation plans [SIPs] that provide for the implementation, maintenance and enforcement of each NAAQS and are referred to as infrastructure SIPs. 42 U.S.C. 7410(a)(1). On July 18, 1997, EPA promulgated new and revised NAAQS for 8-hour ozone (62 FR 38856) and PM_{2.5} (62 FR 38852). EPA strengthened the 24-hour PM_{2.5} NAAQS on October 17, 2006 (71 FR 61144). The 14 elements required to be addressed in infrastructure SIPs are as follows: (1) Emission limits and other control measures; (2) ambient air quality monitoring/data system; (3) program for enforcement of control measures; (4) interstate transport; (5) adequate resources; (6) stationary source monitoring system; (7) emergency power; (8) future SIP revisions; (9) consultation with government officials; (10) public notification; (11) prevention of significant deterioration [PSD] and visibility protection; (12) air quality modeling/data; (13) permitting fees; and (14) consultation/participation by affected local entities.

EPA is acting on three New York SIP submittals, dated December 13, 2007, October 2, 2008 and March 15, 2010, which address the section 110 infrastructure requirements for the three NAAQS: The 1997 8-hour ozone NAAQS, the 1997 annual and 24-hour PM_{2.5} NAAQS, and the 2006 24-hour PM_{2.5} NAAQS. This action does not address the requirements of section 110(a)(2)(D)(I) for the 1997 ozone and 1997 PM_{2.5} NAAQS, since they were addressed in previous rulemakings. See January 24, 2008 (73 FR 4109).

Additionally, this action does not address the requirements of section 110(a)(2)(D)(I) for the 2006 PM_{2.5} NAAQS, which also was addressed in a previous EPA rulemaking. See July 20, 2011 (76 FR 43153). Two elements identified in section 110(a)(2) are not governed by the three year submission deadline of section 110(a)(1) because SIPs incorporating necessary local nonattainment area control are not due within three years after promulgation of a new or revised NAAQS, but rather due at the time that the nonattainment area plan requirements are due pursuant to.

I. What is the background for the actions?

On December 18, 2009, and
supplemented on December 22, 2010,
the State of North Carolina, through NC
DENR, submitted a request to
redesignate the Greensboro Area to
attainment for the 1997 Annual PM_{2.5}
NAAQS and for EPA approval of the
North Carolina SIP revisions containing
a maintenance plan for the Area. In an
action published on September 26, 2011
(76 FR 59345), EPA proposed approval
of North Carolina's plan for maintaining
the 1997 Annual PM_{2.5} NAAQS,
including the emissions inventory
submitted pursuant to CAA section
172(c)(3) and the NO_{x} and PM_{2.5} MVEBs
for Davidson and Guilford Counties in
the Greensboro Area as contained in the
maintenance plan. At that time, EPA
also proposed to approve the
redesignation of the Greensboro Area to
attainment. Additional background for
today's action is set forth in EPA's
September 28, 2011, proposal.

The MVEBs, specified in kilograms
per year (kg/yr), included in the
maintenance plan are as follows:

| TABLE 1—DAVIDSON COUNTY MVEBS |
|-----------------------------|-----------------|
| Conformity MVEB             | 2011            | 2021            |
| NO_{x}                      | 4,086,415       | 2,148,938       |
| PM_{2.5}                    | 153,313         | 153,313         |

| TABLE 2—GUILFORD COUNTY MVEBS |
|-----------------------------|-----------------|
| Conformity MVEB             | 2011            | 2021            |
| NO_{x}                      | 11,133,605      | 6,309,650       |
| PM_{2.5}                    | 421,841         | 421,841         |

In its September 28, 2011, proposed
action, EPA noted that the adequacy
public comment period on these MVEBs
(as contained in North Carolina's
submittal) began on November 23, 2010,
and closed on December 23, 2010. No
comments were received during the
direct public comment period. Thus, EPA
deemed the new MVEBs for Davidson
and Guilford Counties in the Greensboro
Area adequate for the purposes of
transportation conformity on May 3,
2011 (76 FR 24474).

As stated in the September 26, 2011,
proposal, this redesignation addresses
the Greensboro Area's status solely with
respect to the 1997 Annual PM_{2.5}
NAAQS, for which designations were
finalized on January 5, 2005 (70 FR
944), and as supplemented on April 14,
2005 (70 FR 19844).

EPA reviewed PM_{2.5} monitoring data
from ambient PM_{2.5} monitoring stations
in the Greensboro Area for the PM_{2.5}
seasons from 2007-2008. These data
have been quality-assured and are
recorded in Air Quality System (AQS).

The annual arithmetic mean PM_{2.5}
concentrations for 2006-2009 and the
3-year averages of these values (i.e.,
design values) are summarized in Table
3. EPA has reviewed more recent data
which indicate that the Greensboro Area
continues to attain the 1997 PM_{2.5}
NAAQS. The design values for 2007-
2008 and 2008-2010 are also included
in Table 3 and demonstrate that the
Greensboro Area continues to meet the
PM_{2.5} NAAQS and that the ambient
concentrations of PM_{2.5} are continuing
to decrease in the Area. Preliminary
monitoring data for the 2011 PM_{2.5}
season indicate that the Area is
continuing to attain the 1997 Annual
PM_{2.5} NAAQS based on data from 2009-
2011. These preliminary data are
available in the docket for today's action
although they are not yet certified.

II. What are the actions EPA is taking?

In today's rulemaking, EPA is
approving: (1) North Carolina's
emissions inventory which was
submitted pursuant to CAA section
172(c)(3); (2) North Carolina's 1997
Annual PM_{2.5} maintenance plan (such
approval being one of the CAA criteria
for redesignation to attainment status)
for the Greensboro Area, including
MVEBs; and (3) North Carolina's
redesignation request to change the legal
designation of the Greensboro Area from
nonattainment to attainment for the
1997 Annual PM_{2.5} NAAQS. The
maintenance plan is designed to
demonstrate that the Greensboro Area
will continue to attain the 1997 Annual
PM_{2.5} NAAQS through 2021. EPA's
approval of the redesignation request is
based on EPA's determination that the
Greensboro Area meets the criteria for
redesignation set forth in CAA, sections
107(d)(3)(B) and 175A, including EPA's
determination that the Greensboro Area has attained the 1997 Annual PM2.5 NAAQS. EPA's analysis of North Carolina's redesignation request, existing inventory, and maintenance plan are described in detail in the September 26, 2011, proposed rule (76 FR 59345).

Consistent with the CAA, the maintenance plan that EPA is approving also includes 2011 and 2021 MVEBs for NOX and PM2.5 for Davidson and Guilford Counties in the Greensboro Area. In this action, EPA is approving these NOX and PM2.5 MVEBs for the purposes of transportation conformity. For required regional emissions analysis years beyond 2011 and prior to 2021, the applicable budgets will be the new 2021 MVEBs.

EPA is also correcting an inadvertent typographical error for the citation [in EPA's September 26, 2011, proposed rulemaking associated with EPA's adequacy finding for the NOX and PM2.5 MVEB for Davidson and Guilford Counties. In EPA's September 26, 2011, proposed rulemaking, EPA provides the citation for the adequacy determination for the PM2.5, NOX and PM2.5 MVEBs as 76 FR 24472 in the last paragraph of the section entitled 'VIII. What is the Status of EPA's Adequacy Determination for the Proposed PM2.5 and NOX MVEBs for 2011 and 2021 for the Greensboro Area?' and in the second last to last paragraph in the section entitled "X. Proposed Actions on the Redesignation Request and Maintenance Plan SIP Revisions Including Approval of the PM2.5 and NOX MVEBs for 2011 and 2021 for the Greensboro Area." The correct citation is 76 FR 24474. Through this action, EPA is making this correction.

III. Why is EPA taking these actions?

EPA has determined that the Greensboro Area has attained the 1997 Annual PM2.5 NAAQS and has also determined that all other criteria for the redesignation of the Greensboro Area from nonattainment to attainment of the 1997 Annual PM2.5 NAAQS have been met. See CAA section 107(d)(3)(E). One of those requirements is that the Greensboro Area has an approved plan demonstrating maintenance of the 1997 Annual PM2.5 NAAQS. EPA is also taking final action to approve the maintenance plan for the Greensboro Area as meeting the requirements of sections 175A and 107(d)(3)(E) of the CAA. In addition, EPA is approving the emissions inventory as meeting the requirements of section 172(c)(3) of the CAA. Finally, EPA is approving the new NOX and PM2.5 MVEBs for the years 2011 and 2021 as contained in North Carolina's maintenance plan for Davidson and Guilford Counties in the Greensboro Area because these MVEBs are consistent with maintenance of the 1997 Annual PM2.5 standard in the Greensboro Area. The detailed rationale for EPA's findings and actions are set forth in the proposed rulemaking and in other discussion in this final rulemaking.

IV. What are the effects of these actions?

Approval of the redesignation request changes the legal designation of Davidson and Guilford Counties in their entiries from nonattainment to attainment for the 1997 Annual PM2.5 NAAQS. EPA is modifying the regulatory table in 40 CFR 81.334 to reflect a designation of attainment for these full and partial counties. EPA is also approving the revisions to the North Carolina SIP, North Carolina's plan for maintaining the 1997 Annual PM2.5 NAAQS in the Greensboro Area through 2021. The maintenance plan includes contingency measures to remedy possible future violations of the 1997 Annual PM2.5 NAAQS and establishes NOX and PM2.5 MVEBs for the years 2011 and 2021 for the Greensboro Area. Additionally, this action approves the emissions inventory for the Greensboro Area pursuant to section 172(c)(3) of the CAA.

V. Final Action

EPA is taking final action to approve the redesignation and change the legal designation of Davidson and Guilford Counties in their entiries from nonattainment to attainment for the 1997 Annual PM2.5 NAAQS. EPA is also approving the new MVEBs of 4,086,413 kg/yr of NOX and 153,315 kg/yr of PM2.5 for 2011 and 2,146,938 kg/yr of NOX and 153,315 kg/yr of PM2.5 for 2021. Further, for Guilford County, the maintenance plan includes the new MVEBs of 11,132,605 kg/yr of NOX and 421,841 kg/yr of PM2.5 for 2011 and 6,309,650 kg/yr of NOX and 421,841 kg/yr of PM2.5 for 2021. Additionally, EPA is approving the 2008 emissions inventory for the Greensboro Area pursuant to section 172(c)(3) of the CAA. In a previous action, EPA found the new Greensboro Area MVEBs adequate for the purposes of transportation conformity (76 FR 24474, May 2, 2011). Within 24 months from the effective date of EPA's adequacy finding for the MVEBs, the transportation partners are required to demonstrate conformity to the new PM2.5 and NOX MVEBs pursuant to 40 CFR 51.104(e).

VI. Statutory and Executive Order Reviews

Under the CAA, redesignation of an area to attainment and the accompanying approval of the maintenance plan under CAA section 107(d)(3)(E) are actions that affect the status of geographical area and do not impose any additional regulatory requirements on sources beyond those required by state law. A redesignation to attainment does not in and of itself impose any new requirements, but rather results in the application of requirements contained in the CAA for areas that have been redesignated to attainment. Moreover, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 51.22(a).

Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For these reasons, these actions:

- Are not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Do not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Are certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Do not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4); and
- Do not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Are not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Are not significant regulatory action subject to Executive Order 13211 (66 FR 28395, May 22, 2001);
- Are not subject to requirements of Section 12(d) of the National
Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
* Do not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this final rule does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on Tribal governments or preempt Tribal law.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 17, 2012. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b).)
