## Zoning District Purpose Statement

The HB District is primarily intended to accommodate retail service and distributive uses. The district is established to provide locations for establishments which require high visibility and good road access, or which cater primarily to passing motorists. However, the district is not intended to encourage or accommodate strip commercial development. Developments in this district generally have substantial front setbacks. This district is intended for application in Growth Management Areas 2, 3, and 4.

### Applicable Rezoning Consideration from Chapter B, Article VI, Section 6-2.1(S)

(S)(2) - Is/are the use(s) permitted under the proposed classification/request compatible with uses permitted on other properties in the vicinity?

Yes, the site is located in an area that is composed of various commercial, multifamily, and institutional uses.

### Physical Characteristics

The site is heavily wooded and has a moderate slope down from the north to the south.

### Proximity to Water and Sewer

The subject property will be served by public water and sewer.

### Stormwater/Drainage

A stormwater study will be required with this request. The site plan includes a stormwater pond on the southern end of the site.

### Watershed and Overlay Districts

The site is not located within a water supply watershed.
Analysis of General Site Information

The site appears to be suitable for the proposed improvements.

Proposed Access Point(s)
The subject property has public road frontage along Eltha Drive; however, it is accessed by University Parkway via a private drive on the adjacent site to the east.

Trip Generation - Existing/Proposed

Estimated Trip Generation
11,800/1,000 x 2.5 (Mini-Warehouse Trip Rate) = 30 Trips per Day

Sidewalks
There are no sidewalks in the general area.

Transit
Route 44 along Shattalon Drive and Route 10 along University Parkway

Traffic Impact Study (TIS)
Not required because this is a Site Plan Amendment for a previously approved HB-S zoning district.

Analysis of Site Access and Transportation Information

While the subject property has frontage on Eltha Drive, it will be served by University Parkway. WSDOT staff recommends a negative access easement to be recorded along the frontage of Eltha Drive. Staff does not anticipate any negative transportation impacts from this request.

Area Plan Recommendations
- This site is recommended as high-density residential in the NSAP; however, the site is currently zoned HB-S.

Analysis of Conformity to Plans and Planning Issues

The North Suburban Area Plan recommends high-density residential for the subject property; however, the site is currently zoned HB-S. In order to minimize the impact of the proposed parking, vehicular circulation area and storage building to the adjacent residential development, staff recommends a lighting condition along with the use of a Type II or Type III bufferyard along Eltha Drive. A bufferyard would be more appropriate than a streetyard at this location because it would provide more substantial screening of the proposed buildings and parking areas. It is also recommended that a vinyl coated fence (without razor wire) as shown on Exhibit A, be used along Eltha Drive and that said fence be placed on the east side of the bufferyard. The revised site plan addresses these concerns.

#### UDO Sections Relevant to Subject Request

- (A) Legacy policies: Yes
- (B) Environmental Ord.: NA
- (C) Subdivision Regulations: NA

### Analysis of Site Plan Compliance with UDO Requirements

The site plan proposes an 11,800 square foot storage building. When the subject property was rezoned to B-3-S in 1994, the site plan included two similar storage buildings on this portion of the site. Because the current request proposes a design that does not match what was shown on the original approved site plan, a site plan amendment is required.

SITE-SPECIFIC RECOMMENDED CONDITIONS OF APPROVAL

The following proposed conditions are from interdepartmental review comments and are proposed in order to meet codes or established standards, or to reduce negative off-site impacts.

- **PRIOR TO THE ISSUANCE OF GRADING PERMITS**
  a. Developer shall have a stormwater management study submitted for review by the Public Works Department of the City of Winston-Salem. If required, an engineered stormwater management plan shall be submitted and approved by the Public Works Department.

- **PRIOR TO THE ISSUANCE OF BUILDING PERMITS**
  a. An engineered lighting plan shall be submitted to Inspections for any proposed lighting demonstrating the use of full-cut off fixtures, light height @ 25' or less and no more than 0.5 foot-candles at the property line.

- **PRIOR TO THE ISSUANCE OF OCCUPANCY PERMITS**
  a. Lighting shall be installed per approved lighting plan and certified by an engineer.
  b. Proposed vinyl coated chain link fence shall be in substantial compliance with Exhibit A and shall be placed on the inside of the bufferyard.
  c. Developer shall install all stormwater management devices.
  d. Developer shall record a negative access easement along the Eltha Drive frontage except where a gated emergency entrance may be located.
