Transit: Route 13 runs along South Park Boulevard and Peters Creek Parkway.

ANALYSIS

The proposed final development plan is for Piedmont Federal Savings and Loan. The bank will have approximately 3,400 square feet and will be one story in height. Four drive-through lanes are proposed. Access to the site is through two existing private drives. Both drives were approved as part of the original rezoning petition. All of the outparcels and the shopping center site were interconnected with private drives to provide on-site connections between all uses on the property.

Staff would like to see sidewalk connections not only along Southpark Boulevard, but also along the western private drive in order to connect a sidewalk system from the proposed bank to the shopping center. This is a pedestrian connection that stands to benefit the overall shopping center concept. However, there are conflicts between the streetyard requirements and the feasibility of placing a sidewalk in this location, but there does appear to be room on the overall site plan to make adjustments to incorporate the sidewalk.

This Final Development Plan meets all conditions of the original rezoning petition.
