HISTORIC RESOURCES REVIEW

Comments: According to the Southeast Winston-Salem Architectural Survey Planning Phase Report, the neighborhood in which the subject property is located grew into a predominately African-American neighborhood known as Belview during the early 20th century. The First Waughtown Baptist Church was established by African Americans around 1900, with a building being built in 1913 on Moravia Street. The structure located on the property appears to be pre-1950 and retains its original integrity, its demolition is discouraged.

ANALYSIS

The project site lies in an established residential area containing a mix of residential, church and institutional uses. The site is slightly less than one-half acre. The petitioner is requesting a Special Use Permit for the purpose of expanding a parking lot for institutional (church) use in a residentially zoned area.

The site’s proximity to the church provides justification for the granting of a Special Use Permit for additional parking at this location provided that the findings of fact are met. Staff is concerned that the petitioner make efforts to move the house located on the property and discourages demolition of the structure.

According to Section 6-1.5(D) of the zoning ordinance of the UDO, the Planning Board must make the following findings in support of a favorable recommendation:

1. The development is in conformity with Legacy as it relates to the specific area; Yes.
   Although the site will be altered as a result of construction of the parking area, the parking area will support operation of the existing church which will in turn help to stabilize and preserve the neighborhood.
2. Water and sewer are available in adequate capacity; **Yes**.

3. Where buildings greater than thirty-five (35) feet are proposed within the City of Winston-Salem limits, there is adequate access for aerial fire-fighting equipment; **Yes**. No buildings greater than 35 feet are proposed.

4. Streets and highways, both within and in the vicinity of the development, are of such design and traffic-carrying capacity that the development will not create a traffic hazard; **Yes**. The site fronts on a public street with good sight distance.

5. General layout and design of this development meet all requirements of this ordinance; **Yes**.

6. Adequate, safe, and convenient provision is made for vehicular and pedestrian movement on the site with particular attention paid to the needs of public safety equipment and personnel (fire, police, etc.) and service vehicles and personnel (sanitation, postal delivery, etc.); **Yes**.

7. The Planning Board may recommend to the Elected Body conditions as identified in Section 6-1.3(A)(1) for the issuance of the special use permit to reduce impacts associated with the project; **Yes**. See attached site plan conditions.

In addition to these seven findings by the Planning Board, the Board of Aldermen must make affirmative findings as follows to issue a special use permit [Section 6-1.5(F) of the Zoning Ordinance of the UDO]:

1. That the use will not materially endanger the public health or safety if located where proposed and developed according to the application and plan as submitted and approved; **Yes**.

2. That the use meets all required conditions and specifications; **Yes**.

3. That the use will not substantially injure the value of adjoining or abutting property, or that the use is a public necessity; **Yes**.

4. That the location and character of the use, if developed according to the application and plan submitted and approved, will be in harmony with the area in which it is to be located and in general conformity with Legacy; **Yes**.
STAFF RECOMMENDATION
