CONFORMITY TO PLANS

GMP Area (Legacy): Urban Neighborhoods (GMA 3).
Relevant Comprehensive Plan Recommendation(s): Legacy recommends infill development on vacant or under-used parcels of land within the Municipal Services Area.
Area Plan/Development Guide: The site is not within the boundaries of a development guide or an area plan.

ANALYSIS

The subject rezoning request would allow for single family homes to be developed around a small cul-de-sac originally approved for single family home development, then later for twin home development. The proposed site plan shows six single family homes. The existing RSQ-S zoning (W-2369) allows a maximum density of 2.98 units per acre. The proposed single family homes will have a density of 1.72 units per acre.

The site is located on the south side of Robinhood Road between Austin Lane and Avalon Road. A number of mature hardwood trees are on the site. The site adjoins multifamily housing on the south and east sides and single family homes and twin homes on the west side. The land across Robinhood Road to the north is developed with a mixture of single family and attached homes.

Legacy recommends infill development on vacant or under-used parcels of land within the Municipal Services Area. The site is in a neighborhood which currently has a variety of housing options and the proposed density is lower than what is allowed under the existing zoning. Staff is of the opinion that the proposed zoning is in character with the area and is consistent with the recommendations of Legacy.

FINDINGS

1. The subject rezoning request would allow for single family homes to be developed around a small cul-de-sac originally approved for single family home development, and later for twin homes.

2. The proposed single family homes will have a density which is lower than the density allowed under the existing zoning.

3. The site adjoins multifamily housing on the south and east sides and single family homes on the west side.
4. Staff is of the opinion that the proposed zoning is in character with the area and is consistent with the recommendations of *Legacy*.
