ANALYSIS

The subject site is in an area which is rural in character, and has a legally nonconforming fish hatchery currently operating on the site and on an adjoining lot. There is also a retail nursery and garden center zoned LB-S within 200 feet. The remaining properties in the area are either vacant or are developed with single family homes.

The petition represents a relatively uncommon request to rezone property from a moderate density residential zoning district (RS-9) to one of the least intense districts possible (AG). Rezoning is required in this instance because of the need of the existing fish hatchery on the site to expand past the 25% one time threshold allowed legally nonconforming uses. The "Fish Hatchery" use is not allowed in RS-9, but is permitted in the Agricultural (AG) district. This use
reflects a very low scale commercial activity that appears to be compatible with the surrounding neighborhood. The existing operation has peacefully co-existed with its residential neighbors, and the proposed rezoning is not expected to change those conditions. The rezoning is consistent with the objectives of Vision 2005.

The purpose statement of the AG District indicates that it is "primarily intended to accommodate uses of an agricultural nature"; "to preserve the rural character of portions of the county and encourage the continued use of land for agricultural, forest, and open space purposes;" and to "discourage any use which may create premature public infrastructure demands." The AG District is expected to be applied in Growth Management Areas 4B, 5, and 6 principally because of the infrastructure concern. The current site is located in GMA 4A, but should not have uses that will create new infrastructure demand.

**FINDINGS**

1. The petition is consistent with Vision 2005.

2. The petition seeks to rezone approximately 13 acres from a moderate density residential district (RS-9) to a district that permits only low intensity uses (AG) for the purpose of permitting a "Fish Hatchery" use.

3. There is a legally nonconforming fish hatchery presently operating on the site.

4. The fish hatchery use is expected to continue to be compatible with the surrounding neighborhood.

5. The purpose statement of AG encourages uses of an agricultural nature.

**STAFF RECOMMENDATION**

Zoning: **APPROVAL**.

*[For information only: Legacy draft recommendations support rezoning of the site. The site lies in the "Suburban Neighborhood" portion of Forsyth County. Within this area moderate growth is anticipated where infrastructure allows. The rezoning of land currently used for an agricultural purpose such as fish hatchery both allows moderate expansion of a limited scale enterprise while retaining the large lot development protections provided by AG zoning district.]*
