CONFORMITY TO PLANS

GMP Area (Vision 2005): Area 4B: Long-Range Growth.
Relevant Comprehensive Plan Recommendation(s): Staging of development with the provision of roads, sewers and other services; clustered commercial service areas; local convenience stores, farm supply stores, and certain other rural serving commercial development are the only commercial uses encouraged in these areas (GMP Area 4B); areas of future highway commercial development should be limited in length and separated from other highway commercial uses by transition areas; only commercial uses requiring high accessibility or otherwise unsuited for shopping center style development should be allowed to locate in a linear fashion.
Area Plan/Development Guide: This site is located within the Horneytown Area Plan which has been adopted by both High Point and Forsyth County. The Projected Land Use Plan identifies that all of this zoning lot is recommended for "higher intensity residential" zoning.

ANALYSIS

This petition was originally submitted as a general use Limited Business request, and identified as docket # F-1280. The previous petition was initially before the Planning Board at its December 9, 1999 meeting. It was continued to February 10, 2000, to allow time for consideration of an alternative zoning district request, and resubmission as a special use district petition.

On February 10th, the petitioner requested another continuance to March 9, 2000 to complete work on the site plan and meet all submission requirements. The site plan had not been prepared in time to meet the submission deadline for this meeting date, and further delay would have caused the petition to run beyond the 120 day period allowed for the Planning Board to act. The staff recommended that the petition be withdrawn and resubmitted as a special use petition with the modifications recommended by staff. In the interim, both the acreage and number of petitioners making the request was reduced.

The current petition is to rezone a 1.25 acre tract of land (reduced from a 1.68 acre tract previously) from RS-20 to HB-S. The uses proposed are Services, Personal; Services, Business B; and Nursery, Lawn and Garden Supply. The site is currently developed with two single family homes and a manufactured home.

There is a mixture of land uses along this section of North Main Street. These uses include businesses, nursing home, a church, and scattered single family homes. At this location and westward, single family residences are the prevailing land use. There is, however, Highway Business (HB) zoning on the north side of High Point Road directly across from the site. The site plan proposed for this site shows the reuse of single family homes for low intensity business uses.
This site is located within the area covered by the *Horneytown Area Plan* which has been adopted by both High Point and Forsyth County. The Projected Land Use Plan identifies that all of this zoning lot is recommended for "higher intensity residential" zoning. High Point planning officials were consulted regarding the petition, and have not indicated any reasons why the approved plan should be reevaluated. Forsyth County does not provide sewer services to the site and any uses at this location will likely be served by the High Point City sewer system in the future.

The site is located in Growth Management Area 4B: Long Range Growth. *Vision 2005* recommends staging growth with highway and other infrastructure development, and the clustering of commercial services. The property's current moderate density residential zoning is more consistent with these recommendations, but a change to special use Highway Business, with the limited business uses proposed would not be out of character with the moderate level of development in the immediate area, and could be considered part of a "cluster" of commercial activity around the Forsyth/Guilford line.

**FINDINGS**

1. This rezoning is consistent with the recommendations of *Vision 2005*.

2. This rezoning is not consistent with the recommendations in the *Horneytown Area Plan*, but should not significantly alter the character of the surrounding neighborhood.

3. This special use HB petition proposes uses of relatively low commercial intensity in converted single family homes.

4. The site still has some viability for development as single family residential property (under current RS-20 district zoning) or as higher intensity residential zoning per the *Horneytown Area Plan*. The development pace of the area, however, suggests that lower intensity commercial uses here might be appropriate.

**STAFF RECOMMENDATION**

*Zoning: **APPROVAL.***

Staff certifies that the site plan meets all code requirements, and recommends the following conditions:

- **PRIOR TO THE ISSUANCE OF OCCUPANCY PERMITS**
  - Type III bufferyard shall be installed as shown on the site plan. Any necessary waivers will be obtained prior to obtaining certificate of occupancy.
  - Driveway permit shall be issued by the North Carolina Department of Transportation.
[For information only: The site is located in the Future Growth Area of the Forsyth County Growth Management Plan contained in Legacy. Because of the potential to efficiently serve these areas by sewer and other services in the future, the Future Growth Area is expected to eventually urbanize. The timing of development in these areas is very important; the municipal services area (currently served by sewer and other services) should receive most new development and public facilities should be available to support more urban development.]
